

New from Monoflo!

Straight Wall Container System

Unparalleled quality Monoflo's new reusable straight wall container for manufacturing is available in multiple sizes and compatible with other containers to optimize your packaging system.

Product Features and Benefits

- Straight, smooth interior wall design offers maximum cube utilization and easy cleaning
- Enhanced ergonomic handles for improved comfort and safety
- Reinforced external ribbing provides maximum strength and secure stacking
- Perimeter bumper for optimal product protection
- Identification areas on every side to enhance content tracking and labeling
- Drain holes in bumper and handles for easy washing
- Compatible with the 48" x 45" AIAG pallet system
- Available in 12" x 15", 24" x 15", and 24" x 22" footprints, with multiple heights

Injection-molded card holders can be placed on sides or ends of containers

Deep ergonomic handles

Our exclusive cross-stack designed bottom ensures a secure fit when stacking — even when stacking multiple sizes. Also available with solid, smooth bottom.

The Monoflo Advantage

Our commitment to pioneering new products and technologies defines Monoflo as an industry leader. Through our investment in high quality manufacturing processes and innovative cost-saving techniques, we're able to provide our customers with **consistently superior products at competitive prices.**

*When containers are stacked on top of each other, approximately 1/2" is lost to nesting. Example: Bottom container in a stack is 7.5" in height. Containers of the same height stacked on top of it are 7.0" in height. Actual product dimensions and weight may differ nominally from these specifications.

[†]NRSO containers available with both cross stacking and solid, smooth bottom.

Did you know Monoflo delivers solutions for distribution and manufacturing system integration? Meeting exact specifications and ensuring consistent quality is the standard at Monoflo.

Always expect more.
