Monoflo's moving crate and dolly systems are durable and affordable. Improve your performance and productivity at a price you can afford.

Quality

Monoflo's moving crates and dollies have been designed to enhance the efficiency and performance of your moving services. Moving crates are available in multiple sizes and are compatible with other containers to optimize the ease of your move.

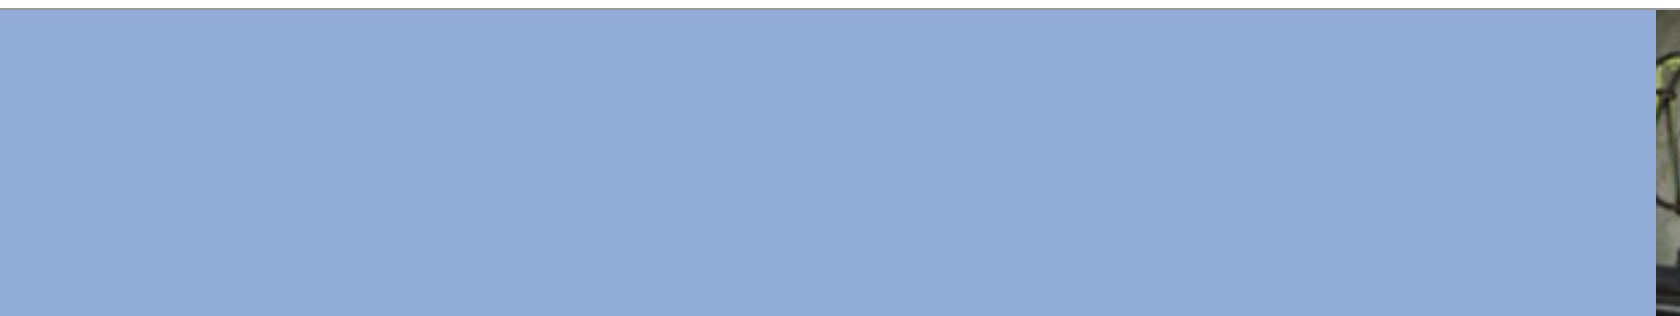

Efficiency

Monoflo crates offer advantages over traditional moving boxes:

- > Increased truckload capacity, and therefore reduced number of truckloads
- > Capacity for standard Monoflo crates is 2.6 cube, 20 – 30% larger than most corrugated boxes, resulting in a need for fewer crates
- > Reduced number of truckloads and crates means reduced labor costs
- > Crushproof, secure crates ensure reliable and safe delivery
- > Reusable, "boxless" moving systems are environmentally friendly

Affordability

Monoflo moving crates and dollies are reusable, durable, easy-to-use, and efficient. This translates into an overall cost savings. In addition, Monoflo offers deferred 4-payment plans for large programs. Your rental income pays for the expense.

“We have been working with the Monoflo moving tote and dolly system for over a year. The products are durable, easy to use, and our customers love them. With Monoflo’s aggressive pricing, we got payback for the expense in just a few moves.”

— AmeriCrate

Crate and Dolly System

- > Each crate and dolly system includes 4 crates per dolly
- > All components offer nestability and stackability for better cube utilization and easy transport
- > Compatible with file rails
- > Reinforced tie holds for minimizing lid damage
- > Textured label areas for easy label removal

“True Form” deep ergonomic carrying handles are designed for safer, easier lifting

Solid dolly construction and top-quality, 4” non-marking casters provide durability and a smooth ride

Compatibility with file rails makes the system ideal for corporate office moves.

Secure lock hinge provides tamper-resistant security
